PERMATEX GROUND CONTROL

11m x 4.5m

15m x 1m

25m x 2m

50m x 2m

80 gsm

PERMATEX™

25
YEARS

LIFE EXPECTANCY

Strong woven membrane for use as a weed control, aggregate separator and ground stabiliser.

Applications

- Under MOT Type 1, Type 3 aggregate, stone and gravel
- Under decking with or without a mulch
- Under garden paths, patios & block paving
- Under a whacker plate or vibrating roller
- Under cellular confinement systems
- Under top dressing for equestrian surfaces

Benefits

- Heavy duty weed control for use over and under ground
- Strong enough for use under gravel on driveways
- Groundwork stabilisation between soil and aggregates
- Prevents mulch or aggregates being lost into the sub soil
- Tear resistant barrier between the ground and the covering
- Low maintenance gardening
- Can be left uncovered (or covered for a longer life)

Instructions for use

- Strim vegetation to ground level ensuring there are no fibrous roots which could penetrate the membrane
- For badly affected areas use a suitable weed killer
- Overlaps need to be 100-120mm wide
- Secure edges by digging a 100-150mm vertical trench along the side of the membrane, tuck the membrane edges into this and backfill

WEEDBAN ULTRA™

WEEDBAN ULTRA

15m x 1m

25m x 2m

50m x 2m

70 gsm

A premium, permeable, non woven landscape fabric that is used to suppress stronger weeds.

25
YEARS

LIFE EXPECTANCY

Applications

- Under decorative aggregates or artificial grass
- Under decking with mulch
- Planting out flowers, shrubs and crops
- Lining plant containers

Benefits

- Heavy duty weed control for use over and under ground
- Strong enough for use under gravel on driveways
- Groundwork stabilisation between soil and aggregates
- Prevents mulch or aggregates being lost into the sub soil
- Tear resistant barrier between the ground and the covering
- Can be left uncovered (or covered for a longer life)

Instructions for use

- Strim vegetation to ground level ensuring there are no fibrous roots which could penetrate the membrane
- For badly affected areas use a suitable weed killer
- Weedban Ultra must be covered with 50mm layer of mulch, aggregate or artificial grass for longer life
- Overlaps need to be 100-150mm wide
- Secure edges with geotextile pegs or dig a 150-200mm vertical trench along the side of the membrane, tuck the membrane edges into this and backfill

Cardboard dump bins also available, please contact us for more information.
